

## AI built for how legal teams work

8am IQ's case assistant helps your firm work smarter with secure, built-in AI that keeps every case moving forward. 8am IQ's case assistant operates within MyCase to automate routine work, surface insights, and enable your team to move faster with clarity and confidence.

### Increase efficiency

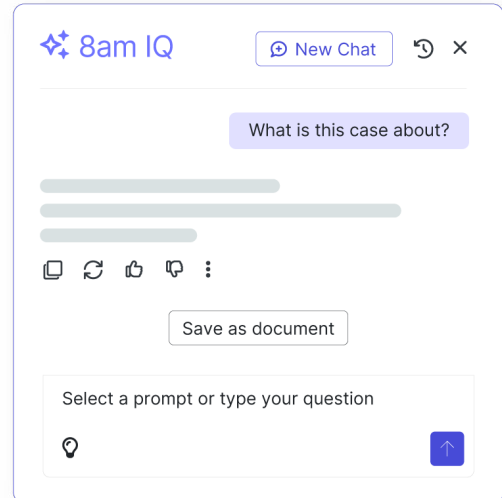

See the whole case at a glance, uncover key insights, and free up time for higher-value work like strategy and client service.

- Surface answers from case fields, notes, and documents in seconds
- Generate concise, shareable summaries automatically
- Make faster, more informed decisions with instant access to case data

### Expand firm capacity

Scale firm knowledge and impact—without adding headcount.

- Automate routine tasks to reduce hiring strain and training time
- Accelerate onboarding with searchable case intelligence
- Improve productivity with smarter, automated workflows built into daily operations

### Ensure accountability and compliance

Strengthen trust and transparency with AI grounded in real case data—not the open web.

- Cite original documents and data sources automatically for verification
- Deliver transparent, traceable outputs that simplify review and oversight
- Reinforce data integrity and audit readiness across the firm

### Why its different

Built securely into MyCase, 8am IQ's case assistant is AI designed for legal professionals—not general users. It's privacy-first, SOC 2 compliant, and included with MyCase Advanced at no additional cost.
